Education

Yashavantrao Chavan Institute of Science, Satara Jul 2024 – May 2027
Bachelor of Vocational in Software Development ***CGPA: 9.28***

Experience

Full Stack Developer Intern June 2026 – Present
Webotix Technology

- Developed and maintained **RESTful APIs** using **Laravel** and **MySQL** across **3+ business modules**, following MVC architecture for scalable backend development.
- Developed admin dashboard features and business websites, automating reporting workflows and reducing manual effort by approximately **40%** while consistently meeting project deadlines.
- Optimized MySQL queries and normalized database schemas across **5+** tables, improving backend response times by $\sim$ **15%**, while contributing to **API** development, database design, and **deployment** of 2 production web applications.

Projects

CareerPilot-AI **Link | GitHub**
React.js, Node.js, Express.js, MongoDB Atlas, SCSS, Gemini AI, Railway, Netlify May 2026

- Built a full-stack AI platform that evaluates resumes against job descriptions and generates personalized interview questions, skill-gap analysis, and preparation plans using **Google Gemini**.
- Implemented an AI-powered resume parsing pipeline using **Multer** and **pdf-parse**, achieving **91%** parsing accuracy across **20+ test resumes** for ATS-style candidate analysis.

ExamNova - Saas Platform **Link | GitHub**
React.js, Node.js, Express.js, MongoDB Atlas, Socket.IO, Redis, Vercel, Render March 2026 – April 2026

- Built a multi-tenant SaaS examination platform with isolated teacher workspaces, RBAC, and asynchronous result processing using **BullMQ** and **Redis**.
- Implemented real-time exam monitoring using **Socket.IO** , achieving average student-to-teacher event latency of **68ms** for live activity tracking.
- Validated platform scalability with **30** concurrent exam sessions using **Artillery**, maintaining stable performance with **0 failures.**

SkillMart - Online Learning Marketplace **Link | GitHub**
MERN, Tailwind CSS, Cloudinary, Render January 2026 – February 2026

- Built an online learning marketplace with role-based access control for Admin, Instructor, and User, developing **20+ REST APIs** for course discovery, enrollment, approval workflows, and **Cloudinary** based media storage.
- Optimized backend performance to maintain average API response times of **221ms**, with course retrieval endpoints responding in under **100ms**.

Achievements

- Earned the **HackerRank Software Engineer Certification**, demonstrating strong software engineering fundamentals and problem-solving skills.
- Secured a **Top 5** position among **20+ teams** at the **RIT Hackathon** for developing **Yojnasetu.ai**, a government scheme recommendation platform.
- Solved **200+ DSA problems** across **LeetCode** and **HackerRank**, strengthening problem-solving skills.

Technical Skills

Languages: JavaScript, PHP, SQL, Java, Python
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, Laravel
Databases: MySQL, MongoDB,
Cloud & Deployment: Render, Railway, Vercel, Netlify, MongoDB Atlas
Tools: Git, GitHub, Docker, Postman, Redis, Figma
Core CS: Data Structures and Algorithms, DBMS, Object-Oriented Programming
